

Slovenia Solar Container 5MWh Agreement

Overview

The project will feature three of Jinko ESS's advanced Utility G2, 5MWh containerized battery energy storage systems, with delivery scheduled for the first quarter of 2026. This agreement highlights the growing confidence in Jinko ESS's technology to provide robust and reliable.

The project will feature three of Jinko ESS's advanced Utility G2, 5MWh containerized battery energy storage systems, with delivery scheduled for the first quarter of 2026. This agreement highlights the growing confidence in Jinko ESS's technology to provide robust and reliable.

Jinko ESS, a global leading energy storage company and a subsidiary of Jinko Solar Co., Ltd. has further expanded its European presence with the signing of a 15MWh utility-scale energy storage project in Slovenia. The project will feature three of Jinko ESS's advanced Utility G2, 5MWh containerized.

Solar and wind power projects with or without energy storage that are on Slovenia's priority list can be submitted for grants from the European Union's Modernisation Fund. The round is worth EUR 29.5 million and the deadline is January 7. Notably, of the 1,117 projects for renewables and.

Slovenia is taking a significant step towards expanding its renewable energy capacity by introducing a new regulation to streamline the funding of large solar and wind projects. The Ministry of Environment, Climate and Energy announced that the regulation will allocate approximately €700 million.

Slovenia has opened a €29 million (\$33.7 million) call under the European Union's Modernisation Fund to support priority solar and wind projects, with applications due by Jan. 7, 2026. Slovenia's Ministry of the Environment, Climate and Energy has published an investment call to co-finance solar.

Slovenia received 11.9 million euros in EU funding to support renewable energy projects, including photovoltaic systems and local energy communities, to boost electricity production and smart energy systems from 2025-2027. Slovenia has secured 11.9 million euros in EU funding to boost community.

Ministry of the Environment, Climate, and Energy Langusova 4, SI- 1000 Ljubljana,

Slovenia Where does Slovenia's electricity come from?

Roughly one-third of Slovenia's electricity comes from hydroelectric sources, one-third from thermal sources, and one-third from nuclear power (with non-hydro).
