

Solar container outdoor power plus emergency power supply

Overview

What is an emergency solar generator?

Emergency solar generators are portable power systems that use solar energy to charge a built-in battery, which then supplies electricity to your devices. They're a clean, quiet, and fuel-free alternative to gas generators. A typical setup includes solar panels, a battery, and an inverter to convert stored energy into usable power.

How much power does an emergency solar power kit use?

If you need emergency power for an entire house or to support power-hungry appliances like air conditioners, you're better off with a 2000-3000W rating. The battery capacity, measured in watt hours (Wh), tells you how much energy an emergency solar power kit can store.

How much solar can a 20 foot container hold?

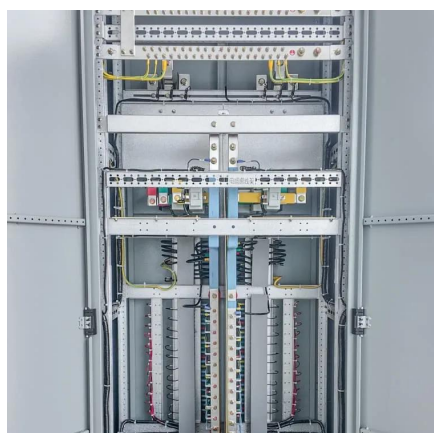

20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future. We love the strategically placed solar panels on top of the container roof - we've accomplished this secure mounting with our field tested RPS Scalable Ground Mount.

How many watts can a RPS container hold?

RPS packages up your shipping container with all of your batteries, power components, mounting etc. safety tucked away inside the container itself. 20 foot containers can expand from 3,000W of solar up to 6,000W. 40 foot containers can expand from 3,000W up to 12,000W of solar in the future.
