

# Solar glass manufacturer installation

## Overview

---

Onyx Solar is the global leader in manufacturing photovoltaic glass for buildings. We develop solutions for the integration of photovoltaic solar energy into buildings (BIPV).

Onyx Solar is the global leader in manufacturing photovoltaic glass for buildings. We develop solutions for the integration of photovoltaic solar energy into buildings (BIPV).

To meet specific requirements, we offer two advanced photovoltaic (PV) glass technologies: amorphous silicon and crystalline silicon, both fully customizable. Our glass can be customized to block the heat that enters the building and to provide the best insulation, thus avoiding the use of air.

As a leading photovoltaic glass Installation, Birkan Solar provides cutting-edge solar glass technology that supports solar energy systems worldwide. Photovoltaic glass plays a crucial role in harnessing solar power by enabling the absorption of sunlight and converting it into electrical energy.

Seamlessly integrated into the building structure, the Solarvolt™ BIPV glass system unveils new possibilities for renewable power generation and glass design. Click highlighted areas to explore. As the exterior face of the building, Solarvolt™ BIPV façades can integrate structural, insulated.

Introducing LoE<sup>3</sup>-340+® – the next generation of Cardinal's top solar and glare control glass. Replacing the previous LoE<sup>3</sup>-340, it maintains the same leading 0.18 SHGC and glare control, now with a more neutral appearance and standard Neat+™ coating. Built for the hottest climates, LoE<sup>3</sup>-340+.

Single building installation can avoid 2.2 million miles of CO<sub>2</sub> vehicle pollution; 12-times more than solar. When modeled for buildings, engineered to outperform rooftop solar by 50-fold: Apply to acres of glass windows on buildings rather than limited rooftop space. Earth-abundant materials.
