

Solar high temperature water pump

Overview

This is a high quality high temperature DC24V submersible water pump ideal for solar panels. It can be driven directly by a solar panel without a regulator. Also, it comes with a speed controller (0-5V) to allow water-flow controlling or computer controlling.

This is a high quality high temperature DC24V submersible water pump ideal for solar panels. It can be driven directly by a solar panel without a regulator. Also, it comes with a speed controller (0-5V) to allow water-flow controlling or computer controlling.

□24V High Temperature Resistant Water Pump□ high temperature resistant circulating water pump, DC booster water pump, widely used, waterproof and durable, submersible, ultra-quiet water pump. □Two Working Modes□ amphibious pump, which can be used without diving or submerged in cold water.

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's.

Harnessing the power of the sun, these energy-efficient pumps offer a sustainable way to move water for gardens, ponds, and more. We put them to the test to see how they'd perform in real-world conditions. We may earn revenue from the products available on this page and participate in affiliate.

This is a high quality high temperature DC24V submersible water pump ideal for solar panels. It can be driven directly by a solar panel without a regulator. Also, it comes with a speed controller (0-5V) to allow water-flow controlling or computer controlling. This pump can handle up to 100'C.

Descriptions: This water pump can be used for industry, agriculture, family water circulation and pressurization. Pump spindle change form motive seal to closed static sealing, so that the leakage of the medium is completely avoided. Features: Can be used for industry, agriculture, family water.
