

Solar modules exported to ASEAN

Overview

The ASEAN Trade in Goods Agreement (ATIGA), which builds on AFTA, means that if your modules meet 'Rules of Origin' criteria (i.e., are substantially produced in Indonesia), they can be exported to other ASEAN member countries with zero or very low import tariffs.

The ASEAN Trade in Goods Agreement (ATIGA), which builds on AFTA, means that if your modules meet 'Rules of Origin' criteria (i.e., are substantially produced in Indonesia), they can be exported to other ASEAN member countries with zero or very low import tariffs.

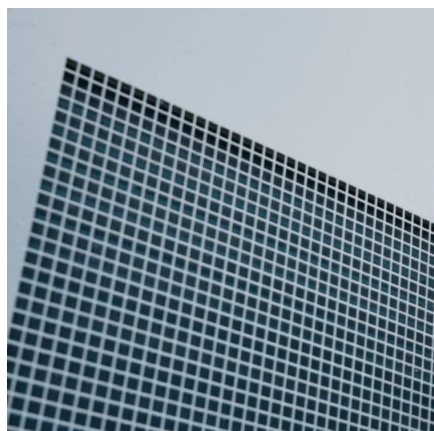

Recent United States (U.S.) tariffs on Southeast Asian solar panels are likely to adversely impact most solar photovoltaic (PV) exports from Malaysia, Thailand, Vietnam, and Cambodia. U.S. policy shifts highlight the need for Southeast Asian countries to diversify their energy mixes and maximize.

While many new investors in solar manufacturing focus on their domestic markets, they often overlook a significant opportunity: using one nation as a strategic base to supply an entire region. Southeast Asia, with its rapid economic growth and escalating energy needs, is a compelling example of.

The first 2025 edition of the Southeast Asia Solar Supply Chain Map includes significant revisions and additions, driven by valuable market feedback and the region's evolving geopolitical and industrial dynamics. Thanks to new data, this edition includes entries such as ICA Solar and United.
