Specifically, onsite solar can play many roles in facility operations, from taking greater control over energy operations and reducing energy spend to future-proofing a facility with dynamic solar plus storage resources. Onsite solar power systems present numerous benefits, ranging from substantial.

Onsite solar is an asset installed in the same location where the energy generated

will be consumed. For each kilowatt-hour (kWh) the onsite solar asset produces, a kWh of consumption will be offset for a buyer of renewable energy, or offtaker. These systems are often described as “behind the.
