

Solar panel price per wp

Overview

As of 2025, the average solar panel installation cost per watt ranges from \$2.50 to \$3.50, including equipment, labor, and permitting. While larger systems require a bigger upfront investment, they typically offer a lower cost per watt and better long-term value.

As of 2025, the average solar panel installation cost per watt ranges from \$2.50 to \$3.50, including equipment, labor, and permitting. While larger systems require a bigger upfront investment, they typically offer a lower cost per watt and better long-term value.

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.

Solar panels cost about \$21,816 on average when purchased with cash or \$26,004 when purchased with a loan for a 7.2 kW system. While that price tag seems steep, the electricity bill savings you get from solar panels make them a worthwhile investment for most Americans. Our team of solar experts.

Solar panel installation costs a national average of \$18,180 for a 6kW solar panel system for a 1,500 square ft. home. The price per watt for solar panels can range from \$2.50 to \$3.50 and largely depends on the home's geographical area. Residential solar panels are usually sized between 3 kW and 8.

This data is expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Data is expressed in constant 2024 US\$ per watt. OurWorldinData.org/energy | CC BY IRENA presents solar photovoltaic module.

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about.

Solar panels cost \$3.00 to \$4.50 per watt installed on average, with homeowners

spending about \$3.75 per watt before factoring in available solar incentives. A 6- to 10-kW solar panel installation costs \$12,600 to \$31,500 after the 30% federal tax credit. Solar panel prices depend on the size.
