Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2024, utility-scale solar power generated 219.8 terawatt-hours (TWh) in the United States. Total solar generation that year, including estimated small-scale.

Generating solar energy is free—using it to power your home can help protect you from rising energy costs. Explore leasing options for the most affordable way to go solar. Generate, use, store and charge—all with one fully integrated clean energy ecosystem by Tesla. All of our products work.
