

Solar panels at Barbados solar plant

Overview

Barbados has taken a monumental step towards energy independence by officially granting a 25-year license for a 50MW solar PV project. This facility, located at the Trents Plantation in St. Lucy, is a cornerstone of the nation's strategy to reduce its reliance on fossil fuels.

Barbados has taken a monumental step towards energy independence by officially granting a 25-year license for a 50MW solar PV project. This facility, located at the Trents Plantation in St. Lucy, is a cornerstone of the nation's strategy to reduce its reliance on fossil fuels.

Barbados is powering forward in its renewable energy transition, granting a 25-year generation license for a landmark 50-megawatt (MW) solar photovoltaic (PV) project. The license, awarded on May 19, 2025, is for a development at the Trents Plantation in St. Lucy, set to be operated by Renewable.

Global Solar Power Tracker, a Global Energy Monitor project. Other names: RSB Renewable Barbados solar farm (Parque Solar Renewable Barbados) is a solar photovoltaic (PV) farm in pre-construction in St. Philip, Barbados. Read more about Solar capacity ratings. The map below shows the.

The Bridgetown 350kW Solar PV Carport Power Plant and Bowmanston 500kW Solar PV Power Plant in Barbados are expected to save US\$381,000 per year by displacing 265,000 litres of diesel fuel and 975 tonnes of carbon annually. Both projects were built in partnership with the Barbados Water Authority.

In 2020 I wrote a review about the Sun Exchange, the world's first peer-to-peer solar panel micro-leasing platform which powers solar projects primarily in South Africa. Now a very similar model is available in Barbados which allows Barbadians to own solar panels within an operating solar project.

Barbados has marked a major milestone in its push for sustainable energy with the launch of its first utility-scale solar plant. Located in St. Lucy, the 10MW facility underscores the island's commitment to reducing its carbon footprint and enhancing energy security. The project—a collaboration.

The RSB (Renewable Solutions Barbados) Group has been granted a license by the

Fair Trading Commission (FTC) to operate a 50 MW solar photovoltaic project in Barbados. This development, set to be rolled out in two phases, marks a significant step forward in the island's renewable energy efforts.
