

Solar power satellite factory in Bangladesh

Overview

Sonnex Energie, a Germany-based company, plans to construct a 500 MW solar module factory in Bangladesh by 2028, with the location yet to be disclosed. The initiative aims to enhance the region's renewable energy infrastructure and support global clean energy goals.

Sonnex Energie, a Germany-based company, plans to construct a 500 MW solar module factory in Bangladesh by 2028, with the location yet to be disclosed. The initiative aims to enhance the region's renewable energy infrastructure and support global clean energy goals.

In 2025, Bangladesh will launch Bangabandhu-2, its third commercial satellite. Designed to cover the Asia-Pacific region, the satellite is expected to generate \$3 million in revenue within its first year. This project coincides with Bangladesh's ambitious renewable energy goals, which aim for 40%.

Germany's Sonnex plans to scale the capacity of its factory in Bangladesh to 500 MW by 2028 and to an unspecified gigawatt scale by 2035. Germany-based Sonnex Energie plans to build a 500 MW solar module factory at an undisclosed location in Bangladesh by 2028. The company formed Sonnex Energie.

In the 1st phase- we will focus on comprehensive market development of Sonnex Energie in Bangladesh, ensuring deployment for the Commercial & Industrial (C&I) sector as well as utility-scale solar projects. Other than manufacturing Sonnex is also collaborating in Capex Model, Opex model, Utility.

With over 2 GW of solar module manufacturing capacity in Germany, Sonnex Energie is now eyeing the cost-effective market of Bangladesh for a 500 MW module plant. (Photo Credit: Sonnex Energie GmbH) German solar module manufacturer Sonnex Energie has announced plans to establish a 500 MW solar.

Germany-based Sonnex Energie has teamed up with Solar EPC Development in Bangladesh. The establishment of a 500 MW solar module manufacturing facility in Bangladesh will strengthen the company's positioning in Asia. Sonnex Energie is using a regional hub in Bangladesh to gain an advantage in.

Bangladesh has set ambitious goals for renewable energy, aiming for 40% of its

electricity to come from clean sources by 2041. This national vision creates a significant opportunity for entrepreneurs looking to enter the solar module manufacturing market. Seizing it, however, requires a clear.
