

# Solar power station in China in Chicago

## Overview

---

High on the Tibetan Plateau, China is building the largest solar farm in the world, a project so vast it covers an area equal to the entire city of Chicago. The facility already produces power on a partial scale and will transform the country's renewable energy landscape once.

High on the Tibetan Plateau, China is building the largest solar farm in the world, a project so vast it covers an area equal to the entire city of Chicago. The facility already produces power on a partial scale and will transform the country's renewable energy landscape once.

China has been installing solar panels at a blistering pace, far faster than anywhere else in the world, and the investment is starting to pay off (Associated Press/Ng Han Guan) Chinese officials recently unveiled plans for what they claim will be the world's largest solar farm, spanning an immense.

High on the Tibetan Plateau, China is building the largest solar farm in the world, a project so vast it covers an area equal to the entire city of Chicago. The facility already produces power on a partial scale and will transform the country's renewable energy landscape once complete. Spanning 610.
