

Syria Air Energy Storage Power Generation Project

Overview

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project – a \$120 million initiative aiming to stabilize the national grid while integrating solar farms across Homs and Aleppo.

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project – a \$120 million initiative aiming to stabilize the national grid while integrating solar farms across Homs and Aleppo.

The Syrian government and the Saudi energy group ACWA Power have signed a Joint Development Agreement (JDA) to explore the development of approximately 2.5 GW of solar and wind capacity in Syria. Under the agreement, ACWA Power will collaborate with Syria's government to identify suitable locations.

Damascus: The Ministry of Energy of the Syrian Arab Republic and ACWA Power, the world's largest private water desalination company, a leader in the global energy transition, and a first mover in green hydrogen, announced the signing of a Joint Development Agreement (JDA) to study develop.

BENY deployed a 100kW/230kWh Air-Cooling Energy Storage System to support essential operations in Syria. The all-in-one cabinet ensures quick installation and stable performance on challenging sites. The system provides $\geq 90\%$ efficiency, IP55 protection, and intelligent air cooling for steady.

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project – a \$120 million initiative aiming to stabilize the national grid while integrating solar farms across Homs and Aleppo. Think of it as building a giant "energy bank" where sunshine gets.

Syria has entered into a memorandum of understanding (MoU) with a consortium led by Qatar's UCC Holding to develop power generation projects valued at \$7 billion. The agreement, signed in Damascus, focuses on constructing four combined-cycle gas turbine power plants with a total capacity of 4GW and.

The Syrian Ministry of Energy and ACWA Power have signed a joint development agreement (JDA) to explore up to 2.5GW of renewable energy projects, marking a significant step in Syria's energy transition. The JDA outlines the development of: -

1GW of solar photovoltaic (PV) capacity - 1.5GW of wind.
