

Tanzania solar inverter equipment container

Overview

The 40-foot solar container is designed to be easily assembled and disassembled in 96 hours due to its PV roof structure and extendable arms. This allows us to electrify entire communities very quickly, initially or temporarily.

The 40-foot solar container is designed to be easily assembled and disassembled in 96 hours due to its PV roof structure and extendable arms. This allows us to electrify entire communities very quickly, initially or temporarily.

With our solar container we focus on solar energy, a sustainable and at the same time the most logical energy source in Africa. We have developed two different containerized systems: our mobile Solartainer Amali and our scalable Solartainer Kani. An intelligent mini-grid system distributes.

We stock a huge range of inverters, used on all kinds of installations from new build to commercial and utility situations. View our variety of inverters from world-leading brands. Complementary products to support your installation. From traditional on-roof domestic arrays to large-scale ground.

We design and install advanced solar carport systems that provide clean energy for electric vehicles and facilities — supporting sustainable mobility and green infrastructure across Africa. Photons Energy Ltd is a local EPC company providing end-to-end solar energy services. We design, procure.
