

# Tingbu Intelligent Photovoltaic Energy Storage Container Long-Term Government Procurement

## Overview

---

Can PV plus storage be deployed cost-effectively at grid-connected sites?

Considerations for Implementing PV Plus Storage Systems at Federal Buildings and Campuses – Recent declines in lithium-ion battery costs, along with changes in net metering policies and utility rate structures, have provided opportunities for PV plus storage to be deployed cost-effectively at grid-connected sites.

Will increased tariffs slow energy storage growth in 2025 and 2026?

Increased tariffs and phase-outs of tax credits have the potential to reduce the base case for energy storage by 20% over the next five years and slow or even reverse the rate of growth in 2025 and 2026, but growth is expected to pick up thereafter.

What are energy storage procurement contracts?

Energy storage procurement contracts must also take into account the ever-evolving suite of laws and regulations applicable to energy storage projects, including as a result of the recent change in administration in the United States.
