

Tokyo s latest solar energy storage policy

Overview

On April 1, 2025, the Tokyo Metropolitan Government implemented a new regulation mandating the installation of solar power systems and energy-saving measures in new residential buildings.

On April 1, 2025, the Tokyo Metropolitan Government implemented a new regulation mandating the installation of solar power systems and energy-saving measures in new residential buildings.

To encourage the generation of renewable energy, the Tokyo Metropolitan Government introduced a regulation mandating the installation of solar panels on the roofs of new detached buildings starting in April 2025. The new regulation will require large house builders—those undertaking projects.

Energy storage can provide solutions to these issues. Current Japanese laws and regulations do not adequately deal with energy storage, in particular the key question of whether energy storage systems should be regulated as a "ge What percentage of Tokyo's rooftops are solar?

Also speaking at World.

On April 1, 2025, the Tokyo Metropolitan Government implemented a new regulation mandating the installation of solar power systems and energy-saving measures in new residential buildings. This regulation is part of the Tokyo Metropolitan Government's broader initiative to promote green policies.

Although solar power provides clean, carbon-free energy, Tokyo has few open spaces large enough to build a major solar power plant. That led the metropolitan government to focus on the roofs of people's homes in revising the ordinance. It aims to raise the capital's installed solar energy capacity.

In a landmark move, Tokyo has announced a new regulation requiring solar panels on new buildings, set to take effect in April 2025. This directive is a key part of the city's comprehensive strategy to achieve net-zero carbon emissions by 2050. The regulation, approved by the Tokyo Metropolitan.

The Tokyo Metropolitan Government, aiming to achieve its "carbon halving" goal of

reducing the city's greenhouse gas emissions by 50% by 2030, is promoting the use of renewable energy. Starting in April 2025, a new system mandating the installation of solar power will be implemented. This means. When will solar panels become mandatory in Tokyo?

An employee at a homebuilding company discusses solar panels with customers in Koganei, Tokyo, on March 23. New homes and residential buildings in Tokyo must come equipped with solar panels as of April 1, when a revised ordinance from the metropolitan government takes effect.

Do new homes in Tokyo need solar panels?

New homes and residential buildings in Tokyo must come equipped with solar panels as of April 1, when a revised ordinance from the metropolitan government takes effect. The original ordinance was the first of its kind in Japan, and after it was enacted, other cities and municipalities began requiring solar panels be installed.

Will Tokyo subsidize solar panels?

In March last year, the Tokyo Metropolitan Government established a 150 billion yen fund to subsidize the installation of solar power generation equipment for Tokyo residents. Subsidies will be provided if solar panels are installed during the construction of new eco-friendly houses or while retrofitting existing houses with insulation.

Why did Tokyo adopt a solar power ordinance?

“The ordinance was an opportunity for people to get a better understanding of solar power generation,” said the manager of the company’s Koganei branch. Although solar power provides clean, carbon-free energy, Tokyo has few open spaces large enough to build a major solar power plant.
