Tunisia replaces energy storage charging station

Overview

Tunisia has inaugurated its first EV charging station powered by solar panels. A 22 kW recharging point will be used by the country’s National Agency for Energy Management (ANME). The pilot project also includes storage batteries.

Tunisia has inaugurated its first EV charging station powered by solar panels. A 22 kW recharging point will be used by the country’s National Agency for Energy Management (ANME). The pilot project also includes storage batteries. “This project aims to show how solar energy can be used to ensure.

During the third meeting of the steering committee for the “E-Mobility Tunisia” program, organized by the National Agency for Energy Management (ANME) on Wednesday, October 29, 2025, in collaboration with the Ministry of the Environment and the United Nations Industrial Development Organization.

Tunisia's electric vehicle (EV) charging infrastructure market is in its formative stages, characterized by modest deployment but bolstered by aggressive policy incentives aimed at accelerating adoption amid the country's energy transition goals. As of mid-2025, the nation hosts approximately 100.

Tunisia has inaugurated its first photovoltaic charging station for electric cars at the country’s Agency for Energy Management (ANME). Tunisia has inaugurated its first solar PV charging station for electric cars at the country’s National Agency for Energy Management (ANME). This project includes.

This was announced by the Undersecretary for Energy Transition, Wael Chouchane, underlining the importance of a national strategy on electric mobility to improve the energy performance of the transport sector. © Agenzia Nova - Reproduction reserved Tunisia aims to reach the target of 50 electric.

Tunis/Tunisia — The first photovoltaic charging station for electric cars was inaugurated on Friday at the seat of the National Agency for Energy Management (ANME). This project, which includes a photovoltaic station with a capacity of 3

kWp, storage batteries and a 22 kW recharging point, will be.
