

U-shaped glass solar curtain wall

Overview

What is a solar curtain wall?

The company's ' solar curtain wall ' covered the entire side of a building with plastic solar film encased in glass. This installation was expected to provide 1.5 kW of power. Unfortunately, the company filed for bankruptcy in 2012 but they did help to further the solar power curtain concept. Another option comes from a company called SolarGaps.

What is a 'U' shaped glass wall?

Self-supporting, "U"-shaped cast glass channels and an extruded perimeter frame make up this decidedly contemporary wall that obscures vision but allows light to pass through. The channel glass' lower iron content allows for greater light and solar transmission with a less green appearance than is typical of standard glass.

What is curtain glazing used for?

Curtain glazing is used in large glazed facades, offering high light transmission. Glass curtain walls and glass for curtain walling enhance design.

What is curtain wall glazing?

The curtain wall method of glazing enables glass to be used in large, uninterrupted areas of a building envelope, creating consistent, attractive facades.
