

# Ukrainian solar glass

## Overview

---

Is glass made in Ukraine?

Currently, glass is not produced in Ukraine, and the country's economy is completely dependent on products that are imported from Europe and Russia. Agromat is carrying out the project together with an American technical partner, where 600-700 people will participate in the construction.

How much glass does Ukraine use a year?

Before Russia's full-scale invasion, Ukraine consumed 32 million m<sup>2</sup> of glass annually. By 2023, this figure had dropped to 19.6 million m<sup>2</sup>. NovaSklo's first production line will have an annual capacity of 25 million m<sup>2</sup> — less than pre-war demand.

Why is glass manufacturing important in Ukraine?

Glass manufacturing is a critical sector within the processing industry, playing a strategic role in construction, industrial production, and the country's post-war recovery. The construction of this plant will create new jobs and attract additional investment into Ukraine's industrial sector.

How will novasklo impact Ukraine's glass industry?

Currently, Ukraine is entirely dependent on imported glass. NovaSklo will reduce reliance on foreign suppliers, making the domestic market more resilient and competitive," emphasized Olga Batova, CEO of investment company EFI Group.
