The unique shape allows the surge protector to attach to the end of my desk, out of sight, but just where I need outlet protection. Living in Florida, the lightning capital of the world, I have had no problems with the power fluctuations and my equipment. Helpful?

(1) (0) Initially, I wasn't sure.

Works great until it doesn't. Not sure what happened, but I keep getting an overload error; even with nothing plugged in. Spoke with Panamax tech support (a good experience BTW). The only troubleshooting is to disconnect the battery for 15 minutes or so and try again. That did not resolve my issue.

She has spent countless hours charging, discharging, and recharging batteries. After a new round of testing, the CyberPower LE1000DG is our new top pick. We've also added several models to Other UPS worth considering and The competition. Most people can get through a household power outage without.

An uninterruptible power supply provides backup power for your home appliances and other electronic devices while facing a power shutdown. The purpose of a UPS is to provide emergency power made up of a lead battery to a load when the input power supply gets disrupted. Buying Guide Feedback: 93%.

Power outages and electrical fluctuations can cause serious disruptions, whether you're working from home, running a business, or using a gaming PC. An uninterruptible power supply (UPS) helps prevent sudden shutdowns, data loss, and hardware damage by providing backup power when your main.
