Join us as we take a detailed walk-through of the planning and installation of our 3kW - 5kWH - 120V off-grid solar system that powers a rehabbed shipping container! Hi there, we're Jonathan & Ashley from Tiny Shiny Home. Our family of 6 spent many years traveling full-time in our renovated vintage.

The container's strength is in its corrugated walls. Cutting holes for windows and doors weakens the structure. You will need professional engineering and steel reinforcements. Steel is also a poor insulator. Your home will need excellent insulation and ventilation. Otherwise, it will be too hot in.

A solar container is essentially a portable, self-contained unit equipped with solar panels that harness sunlight to generate electricity. By integrating solar containers into residential settings, individuals can significantly reduce their carbon footprint, lower energy costs, and promote.

Choosing to live off-grid in a container home isn't just an alternative lifestyle — it's a calculated decision of energy independence, sustainable living, and long-term economic strategy. While the modular nature of container architecture already offers mobility and affordability, achieving true.

So, how do you know you're getting a high-output, dependable system and not just an eye-catching metal box with a couple of solar panels slapped on top?
