On July 31, at the historic Palazzo Borromeo, the Holy See and the Italian Republic signed a landmark agreement to build an agrivoltaic system in Santa Maria di Galeria. Photo: Vatican Media According to the Vatican's press office, the installation will apply the most advanced solutions currently.

ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City into the world's first.

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled *Fratello Sole*, or "Brother Sun." The Holy Father has tasked the relevant Vatican governing bodies to collaborate with Italian.

The Holy See and the Italian Republic have signed an agreement to build an agrivoltaic plant in the Vatican's Santa Maria di Galeria area just outside of Rome, aiming to supply Vatican City State with renewable energy. By Vatican News Upholding and taking action on a shared commitment to promote.

"The Vatican" has recently completed a solar array or garden upon the 6,000 square yard Paul VI Hall and teamed with a Hungarian carbon offset start-up called Klimafa, making Vatican City the first carbon-neutral state of the world. [1] The reasoning behind Catholic support of solar photovoltaic.

Surprisingly, the Vatican Solar Air Conditioning Plant has become a flagship project blending renewable energy with heritage preservation. This initiative isn't just about staying cool—it's a blueprint for how religious and historical sites can adopt

green technology without compromising their.
