Victoria continues to be one of Australia's fastest-growing battery markets, installing more than 8,600 systems in the last quarter of 2025 alone. With the state government's Cheaper Home Batteries Program and supporting federal incentives, the payback period for batteries has never been shorter.

Victoria's renewable energy targets legislated in the Renewable Energy (Jobs and Investment) Act 2017 (Vic) are: These targets include offshore wind energy generation targets of: 9 GW by 2040. Victoria's legislated energy storage targets are: at least 6.3 GW by 2035. The energy storage targets will.

The state programme has now been replaced by the federal government's Cheaper Home Battery Program. Image: Solar Media. Victoria's home battery energy storage programme has supported the installation of approximately 20,000 residential energy storage systems, doubling its original target of 10,000.

According to MarketsandMarkets, the residential energy storage market size is projected to grow at a compound annual growth rate (CAGR) of 9.3%, reaching \$45.8 billion by 2030, up from \$26.9 billion in 2024. This robust growth highlights the increasing demand for energy storage systems in.

Australia's remarkable run of investment commitments to energy storage projects continued in Q1 2025. Six storage projects representing 1,510 MW (capacity) / 5,016 MWh (energy output) reached financial close - the second-highest quarterly result for newly financially committed storage projects. New.
