NATIONAL ENERGY AND CLIMATE ACTION PLAN OF ...

Competitiveness of the energy sector
Administrative structure of implementing national energy and climate policies
1.3 Consultations, involvement of national and Union entities, and the outcome of consultations
1.4 Regional cooperation in preparing the plan
Structure of energy transmission
Project for enhancement of Latvia-Lithuania interconnection (ELLI)
2.5 Dimension Research, innovation and competitiveness
Objectives set out in the National Energy Independence Strategy
Trends of research into climate change processes
T10. Restriction of access to designated urban areas for vehicles with ICEs. Creation of urban low-emission
T18. Establishment and implementation of a system of tax incentives
Establishment and adaptation of a
T25. Reducing traffic congestion through spatial planning solutions. Making recommendations to
T26. Promoting flexible working hours and remote work. Education and information for employers and
T27. Elimination of pollution tax concessions for operators engaged in individual activities. To

abolish the T29. Promotion of zero-emission taxi and ridesharing service providers. The obligation for taxi and T32. Improving access to and use of public transport. The following measures will be implemented: P10. Introduction and promotion of technological eco-innovation. The measure is intended for small and P14. Promoting the transformation of traditional industries. Encouraging the transformation of traditional Measure Scope and results/effect envisaged Implementation period Entities responsible for implementing the policy Total GHG reduction effect, thou t CO₂ eq, 2021-2023 A7. Promotion of partial change of the composition of animal feed by reducing methane and nitrogen emissions. To inform farmers about the impact of certain changes in the composition of feed on GHG A9. Promoting environment-friendly and sustainable farming practices. To publicise good practices in A10. Informing farmers about climate change mitigation potential (GHG quantities) at farm level. Providing A11. Promoting of more productive, disease and climate-resilient livestock and fish breeding. To inform A14. Abolition of environmentally harmful tax concessions for transport used in agricultural activities. Higher Waste management sector K4. Improvement of waste sorting skills among residents. Raising public awareness of the possibilities, The sector of land use, land use change and forestry PLANNED POLICY MEASURES PLANNED POLICY MEASURES Additional support measures contributing to the development of RES-E: One of the most important challenges facing the energy sector is to increase the competitiveness of the country's economy and ensure the supply of energy and energy resources at competitive market prices, which would be one of the lowest in the region. In Lithuania, energy and energy resources account for a significant share of industrial costs and See more on energy.ecropa European Commission [PDF]
