

Wholesale 220v power station in Senegal

Overview

When will West African energy open a gas power station in Senegal?

West African Energy, a Senegalese energy company, plans to open Senegal's first and largest 300 MW combined cycle gas power station in January 2024.

How is electricity generated in Senegal?

Electricity generation, mainly on a build-own-operate (BOO) basis, is open to the private sector. Senelec, the sole buyer, signs power purchase contracts with independent power producers (IPPs). The Manantali Dam in Mali generates some of Senegal's electricity needs. Senegal's major source of electricity is diesel.

How much does electricity cost in Senegal?

Due to dependence on expensive liquid fuels for 90 percent of power generation, Senegal has some of the highest generation costs in Africa. While electricity generation costs range from 34 to 38 cents per kilowatt hour, consumers pay roughly 24 cents per kilowatt hour with the difference covered by government subsidies.
