What does a circuit breaker do?

A circuit breaker is a safety device designed to protect an electrical circuit from damage caused by overcurrent or short circuits. It automatically interrupts the flow of electricity when a fault is detected, preventing potential hazards like fires or equipment damage. Are your circuit breakers compliant with Australian standards?

.

What is the difference between a single-pole and a three-pole circuit breaker?

Single-pole circuit breakers are suitable for single-phase circuits, commonly found in residential and light commercial settings. Three-pole circuit breakers are designed for three-phase circuits, typical in industrial and heavy commercial environments. Ensure you select the appropriate type based on your system's configuration.
