

# Wind Solar and Storage Investors

## Overview

---

Why should investors care about energy trends?

For investors, understanding these trends isn't just about keeping up with market shifts—it's about positioning for the long-term structural changes reshaping how the world generates, stores, and distributes energy. The numbers tell a compelling story.

What does a sustainable infrastructure investor do?

Global sustainable infrastructure investor building and operating energy, digital, and real-estate assets in growth markets. Growth markets: Builds sustainable infra across energy, digital, real assets. Operational control: Develops, owns, and scales platforms to maturity. Regional expertise: EMEA, APAC, LATAM with deep local networks.

What is India doing with solar energy?

India accelerates with 18 GW of solar and 8 GW of wind capacity, emphasizing large-scale solar parks and hybrid projects supported by government grid modernization funding. Solar technology continues advancing with tandem perovskite-silicon cells achieving 28.6% efficiency in commercially viable applications.

How is solar technology advancing?

Solar technology continues advancing with tandem perovskite-silicon cells achieving 28.6% efficiency in commercially viable applications. Solar tracker integration, now standard for utility-scale installations, increases energy yields by 15-30%. Manufacturing innovations are simultaneously driving down costs and improving performance.
