While facing headwinds and strategic shifts, the company is leveraging battery energy storage systems (BESS) as a key component of its evolving portfolio. Through its subsidiary, Lightsource bp, BP is developing, owning, and operating utility-scale solar and energy storage projects. This move aims.

BP has made headlines with its decision to sell its U.S. onshore wind energy business to LS Power, a New York-based renewable energy developer. This move marks a significant shift in BP's strategy as it pivots away from renewable investments amid ongoing financial challenges. The sale, which.

These assets, which span 10 operating onshore wind farms across seven U.S. states, represent a total net generating capacity of 1.3 GW. However, BP has determined that these assets no longer align with its growth objectives, particularly as it shifts focus towards solar energy through Lightsource.

bp today announced that it has agreed to sell its US onshore wind business, BP Wind Energy North America Inc. (bp Wind Energy), to LS Power, a leading development, investment and operating company focused on the North American power and energy infrastructure sector. After close, bp Wind Energy will.

At the end of 4Q 2024, our renewables pipeline stood at 60.6 gigawatts (GW). GW explained A gigawatt is how we measure the scale of renewables projects. 1GW = 1,000 megawatts = 1 billion watts. In August 2025, JERA Nex bp - a 50:50 joint venture with JERA - was launched. JERA Nex bp will have the.
